OBJECTIVE

Data Enthusiast with a Bachelor of Computer Science, seeking an entry-level opportunity to apply Python, SQL, and analytical skills in real-world data-driven environments while continuously learning and growing.

EXPERIENCE

Fresher — Open to Internships & Entry-Level Opportunities

EDUCATION

Bachelor of Computer Science (B.Sc)	2025
HSC (Science)	2022
SSC	2020

CERTIFICATIONS & TRAINING

Seven Mentor IT Training Institute

Data Science and Analytics Training - Hands-on training in Python, SQL, Excel, Power BI, Statistics, Machine Learning, Deep Learning & AI

TECHNICAL SKILLS

- Languages: Python
- Databases: MySQL
- Tools: Excel, Power BI
- Concepts: Probability & Statistics, Data Visualization, Data Cleaning,
- Version Control: Git, GitHub
- Soft Skills: Problem Solving & Critical Thinking, Quick Learner with Continuous Improvement Mindset, Clear verbal and written communication, Team Collaboration

PROJECTS

Employee Management System (EMS)

- Developed a Python-based system to manage employee records with CRUD operations.
- Designed and implemented a MySQL database for structured employee data storage.
- Implemented search and filtering functionality for efficient record retrieval.
- Enabled data import and export using Excel/CSV for basic data handling.
- Used Git/GitHub for version control and project management.

Expense Tracker Web Application

- Created a web-based application to track daily expenses by category, amount, and date.
- Executed CRUD operations using Flask with SQLite for persistent data storage.
- Integrated interactive charts using Chart.js to visualize category-wise expense data.
- Calculated and displayed total expenses dynamically to support quick financial analysis.
- Managed project versions and updates using Git and GitHub.
- Implemented input validation and data sanitization routines to ensure accurate data cleaning and consistency before database storage.

LANGUAGES

English, Marathi, Hindi
